PROFILE

AI Vibe Coding engineer who ships real products by pairing LLMs with strong product taste and engineering judgment. Use Cursor and Claude as default collaborators—draft intent, explore options, scaffold, refactor—then validate on staging and with real users. Founder of KribSavup / TGS with a large portfolio of paid web and mobile apps built end to end in an AI-native loop.

1. Intent 2. AI plan 3. Build 4. Test 5. Ship 6. Polish

HOW I VIBE CODE (TECHNICAL)

AI-first investigation & planning

Start from the user problem, not a ticket dump. Use Claude/Cursor to map constraints, propose architecture, and generate implementation plans—then edit the plan before writing code.

Scaffold → refine with judgment

Generate components, APIs, tests, and refactors with AI; keep quality bars for security, readability, and product UX. Never ship raw model output in sensitive flows.

Shareable AI workflows

Document prompts, patterns, and review checklists so teammates move faster without cutting corners that matter to users.

PRODUCTS SHIPPED WITH AI-NATIVE BUILDING

- **Guess The Move · Doodlez · TigerGenie · Yotoku** — consumer apps built and released fast.
- **GetWaterFit · Charge Savvy · MyFuel · EveryChat** — React/Next web products with AI-assisted delivery.

EXPERIENCE

AI Vibe Coding Engineer · Founder

Feb 2020 – Present

Griggs Mutual Holdings, LLC · KribSavup / TGS · Eastvale, CA

- Build and ship multiple production apps using Cursor + Claude as the default coding loop.
- Own features end to end: UI → API → data → deploy; AI for speed, humans for taste and risk.
- Prototype quickly, test on staging, release, learn from real users, then systemize and polish.
- Maintain a portfolio of paid products across React, Next.js, React Native, and backend services.

President / CEO — Mission Technology

Feb 2022 – Present

Steward's Mission, Inc. (501(c)(3)) · Beaumont, CA
