

Timothy Griggs

Full Stack Software Developer

Los Angeles Metropolitan Area Griggs Mutual Holdings, LLC [linkedin.com/in/timothy-griggs-81352b94](https://www.linkedin.com/in/timothy-griggs-81352b94) kribsavup.com

PROFESSIONAL SUMMARY

Full stack software developer and product builder focused on web applications, APIs, and finance-technology platforms. Founder of TGS Financial System / KribSavup, responsible for end-to-end delivery of consumer finance software—from product requirements and UI through backend services, integrations, and release. Works with a development team to ship reliable production features for real users, partners, and community programs.

TECHNICAL SKILLS

Frontend	JavaScript, TypeScript, React, HTML5, CSS3, responsive UI, dashboards, admin panels
Backend	Node.js, REST APIs, authentication flows, business logic, server-side integrations
Data	SQL / PostgreSQL, MongoDB, data models for user accounts, budgets, and activity tracking
Platform	Git, cloud-hosted apps, CI-ready workflows, environment config, monitoring basics
Domains	SaaS / MVP builds, FinTech, financial literacy tools, content + product delivery
Delivery	Agile sprints, code review with teammates, QA handoff, milestone-based client delivery

EXPERIENCE

Full Stack Software Developer / Founder

Present

TGS Financial System · KribSavup (formerly TGS) · Los Angeles, CA

- Built and shipped KribSavup, a full stack financial-intelligence product helping users budget, track habits, and take action on money goals.
- Owned product-to-engineering delivery across frontend experiences, API services, and data flows for accounts, tools, and educational content.
- Implemented user-facing features for budgeting, progress tracking, and guided financial actions with clear, accessible UX.
- Led a small development team (frontend, backend, content, media) to deliver production releases on schedule.
- Integrated partner and community use cases so the product could be adopted quickly at events and education programs.

Software Product Lead — Community Platforms

Ongoing

Steward’s Mission · Los Angeles, CA

- Connected full stack finance software with community programs so participants could access tools immediately after workshops and outreach events.
- Translated real user needs (budgeting stress, irregular income, credit literacy) into prioritized backlog items for web/app delivery.
- Coordinated technical and non-technical contributors to keep product, content, and outreach aligned.

Principal — Software Delivery & Team Management

Ongoing

Griggs Mutual Holdings, LLC · Los Angeles, CA

- Managed full stack contractors and specialists for product builds, reporting systems, and media/engineering support workstreams.

- Defined scopes, milestones, acceptance criteria, and review cycles to keep multi-contributor projects shipping reliably.
- Maintained client-ready communication, timelines, and quality standards across concurrent software initiatives.

SELECTED PROJECTS

- **KribSavup (Full Stack FinTech):** Consumer finance web/mobile product for budgeting, habits, and actionable financial guidance.
- **Admin & reporting workflows:** Internal tooling and reporting delivery for finance-product operations.
- **Education-to-product loop:** Financial literacy content paired with software features users can use the same day.

EDUCATION

Dominguez High School

Los Angeles area

ADDITIONAL

- Strong domain expertise in consumer financial wellness and community-facing technology products.
- Comfortable owning full stack delivery while coordinating specialized teammates (UI, backend, QA, content).
- Available for full stack web/app engagements — hourly or fixed-price milestones.
