PROFILE

Java developer experienced building and shipping multiple production projects—Spring backends, Android (Java) apps, and JVM services powering SaaS and mobile products. Own features from API design and data access through testing and release. Founder of KribSavup / TGS; collaborate with product partners to deliver reliable, scalable Java systems.

JAVA PROJECTS BUILT

Blackwater Billing · Java Spring · Vue front end

blackwaterbilling.com

Built Spring backend services for billing workflows—REST APIs, business rules, persistence, and integration with a Vue SPA for admin/user operations.

KribSavup / TGS Good Steward · Java services · Mobile clients

kribsavup.com

Designed and maintained Java/JVM backend services supporting fintech features (accounts, guidance tools, partner integrations) consumed by iOS/Android apps.

FlightView & Blade Mobile · Java / Android

flightview.com · Blade Mobile

Contributed Java Android modules for real-time tracking/status experiences—networking, parsing, and resilient UI state for production store apps.

TempConnect · CRMGrow · Look N Lease · Java APIs · Mobile

Delivered Java API layers and service logic supporting staffing, CRM, and leasing products across web and mobile clients.

Additional Java / Android releases · Play Store

BGF InfoCenter, Hangover Predictor, and related Android (Java) apps—store packaging, crash fixes, and iterative feature delivery.
