Dominguez High School
Los Angeles area · 1973–1976

AVAILABILITY

US-based · No sponsorship
Full-time W-2 · Remote
Target: \$75,000–\$100,000

PROFILE

Junior Python developer with hands-on project experience building and improving Python-based application features for a consumer fintech product (KribSavup / TGS). Strong foundation in Python programming, clean/testable code practices, Git collaboration, SQL/API basics, and a clear willingness to learn team standards quickly in a remote full-time role.

TECHNICAL PROJECTS

KribSavup / TGS Financial System — Python application work

- Contribute Python scripts and service-side logic supporting budgeting, credit, and homeownership-prep product workflows.
- Work with JSON data, REST-style API calls, and database-backed features as part of iterative product development.
- Write readable Python using functions, modules, data structures, exception handling, and object-oriented patterns.
- Use Git for source control; participate in technical discussions and review feedback with development teammates.
- Debug application issues, improve existing functionality, and document technical changes for handoff.

API & data practice

- Build small Python utilities that call APIs, parse JSON responses, and prepare data for product/feature use.
- Apply basic SQL queries against relational data for reporting and feature support tasks.
- Create or maintain simple automated tests (pytest-style) to validate core functions.

EXPERIENCE

Founder · Python / Product Contributor

Feb 2020 – Present

Griggs Mutual Holdings, LLC · KribSavup / TGS Financial System

Eastvale, CA · Remote-capable

- Develop and maintain Python-supported application features for a live fintech product used in financial wellness workflows.
- Collaborate with developers on clean code, debugging, testing, and continuous improvement of services and tools.
- Learn and apply engineering standards around Git workflows, documentation, and code review participation.

President / Community Technology Programs

Feb 2022 – Present

Steward's Mission, Inc. (501(c)(3))

Beaumont, CA

- Support technical delivery of finance tools into community programs; gather requirements and document outcomes.

Owner · Mortgage & Real Estate Broker

Jan 2012 – Present

Griggs Mutual Realty & Management

Eastvale, CA

- Domain expertise in credit and homeownership journeys that informs practical Python feature requirements for fintech tools.

WHY THIS ROLE

- Excited to grow as a Junior Python Developer writing clean, testable code in a collaborative remote team.
- Ready to deepen Django/Flask/FastAPI, REST APIs, pytest, and SQL skills with mentorship and code reviews.
