TECHNICAL SKILLS

- C# (5+ years commercial use)
- WPF · .NET desktop UI
- C++ · Modern C++ exposure
- MVVM · OOP · Design patterns
- Async · Task Parallel Library
- UI/UX for complex workflows
- APIs · SDKs · Frameworks
- Agile · Scrum collaboration
- Debugging · Root-cause analysis
- Testable software · Git

DOMAIN

Spatial / property workflows
Raster & imagery interest
2D / 3D analysis UI

EDUCATION

California School of Real Estate
Real Estate Licensing

Dominguez High School
Los Angeles area · 1973–1976

TARGET COMP

\$123,000 – \$175,000 base
(Esri range: \$123k–\$202k)

PROFILE

Desktop UI software developer with hands-on C# / .NET experience building WPF-style application interfaces for complex real-world workflows. Lead design and delivery of C# components for KribSavup / TGS, collaborating across engineering and product partners in agile environments. Strong interest in ArcGIS Pro imagery/raster tooling—combining clear UX, MVVM patterns, async C# programming, and reliable component delivery.

SELECTED IMPACT

- Built and shipped C# / WPF desktop UI components that simplify complex multi-step user workflows.
- Applied MVVM, OOP, and async C# (Task Parallel Library) for responsive, maintainable interfaces.
- Collaborated with engineers on C# implementation design, debugging, code reviews, and timely releases.
- Created reusable C# frameworks/SDK-style components for other developers consuming shared APIs.

EXPERIENCE

Software Developer · C# / WPF Desktop UI Feb 2020 – Present

Griggs Mutual Holdings, LLC · KribSavup / TGS Financial System
Eastvale, CA

- Develop production UI components in C# and WPF/.NET for desktop and application workflows used by real customers.
- Implement MVVM view-models, data binding, and object-oriented C# patterns to keep UI logic testable and maintainable.
- Use asynchronous C# programming with the Task Parallel Library for responsive UI during service calls and longer-running processing.
- Extend selected performance-sensitive paths with C++ interop/native modules where appropriate; follow modern C++ style with teammates.
- Collaborate on C# implementation designs; diagnose incorrect software behavior and resolve root causes with product engineers.
- Design reusable C# components, frameworks, and SDK-style APIs for other engineering contributors; ship on agile release cadence.

President / CEO — Technology Programs Feb 2022 – Present

Steward’s Mission, Inc. (501(c)(3))
Beaumont, CA

- Partner with technical and non-technical stakeholders to translate real-world workflow needs into clear UI and product requirements.

Owner · Mortgage & Real Estate Broker Jan 2012 – Present

Griggs Mutual Realty & Management
Eastvale, CA

- 25+ years domain expertise in property, mapping-adjacent decision workflows, and complex multi-step user processes informing UI design priorities.
- Strong understanding of how professionals use visual/spatial context to make faster, clearer decisions—aligned with imagery & raster analysis UX goals.

General Manager Oct 1994 – Nov 2014

Commercial Door Company Inc.
Pomona, CA

- Led operations and multi-team delivery for 20 years—strong foundation for prioritization, teamwork, and shipping under deadlines.

WHY ESRI

- Motivated to build ArcGIS Pro imagery/raster UI that helps users complete complex 2D & 3D analysis workflows faster.
- Eager to deepen C#, WPF, C++, TPL async, MVVM, and ArcObjects/Raster Object Model expertise on a creative engineering team.
