

# Timothy Griggs

## AI Data Scientist · FinTech & Intelligent Finance Products

Los Angeles Metropolitan Area   Griggs Mutual Holdings, LLC   [linkedin.com/in/timothy-griggs-81352b94](https://www.linkedin.com/in/timothy-griggs-81352b94)   [kribsavup.com](https://kribsavup.com)

### PROFESSIONAL SUMMARY

AI data scientist and product builder focused on intelligent finance experiences— turning financial behavior data, educational content, and user goals into actionable recommendations. Founder of TGS Financial System / KribSavup, leading AI-assisted finance product design, data-driven feature delivery, and team execution from problem definition through production release for real community and partner users.

### TECHNICAL SKILLS

|              |                                                                                                                              |
|--------------|------------------------------------------------------------------------------------------------------------------------------|
| AI / ML      | LLM applications, AI finance agents, prompt design, RAG for knowledge/content, recommendation flows, model evaluation basics |
| Data Science | Python, data wrangling, exploratory analysis, feature thinking, KPIs, cohort/behavior insights, experiment-minded delivery   |
| Data Stack   | SQL / PostgreSQL, MongoDB, analytics pipelines, dashboards, user event & finance activity data                               |
| Product AI   | Conversational guidance UX, personalization, next-best-action logic, financial literacy → action loops                       |
| Engineering  | Python/JS APIs, REST integrations, Git, cloud-hosted apps, collaboration with full-stack teammates                           |
| Domain       | FinTech, budgeting & money habits, consumer financial wellness, community finance programs                                   |

### EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |         |

| Steward's Mission · Los Angeles, CA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |         |
| <ul style="list-style-type: none"><li>Connected KribSavup AI/finance tools to community education events so participants could act on insights the same day.</li><li>Translated real-world financial challenges (irregular income, budgeting stress, credit literacy) into data problems and product requirements.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                  |         |

- Used program feedback as labeled qualitative signal to refine guidance content, recommendations, and success metrics.

## **Principal — AI/Data Delivery & Team Coordination**

Ongoing

Griggs Mutual Holdings, LLC · Los Angeles, CA

- Directed contractors and specialists across analytics, product engineering, reporting, and content for finance-AI initiatives.
- Set problem statements, milestones, and acceptance criteria for data/AI deliverables and production handoff.
- Maintained clear stakeholder communication while managing concurrent AI and software workstreams.

## **SELECTED AI / DATA FOCUS**

---

- **AI Finance Agent:** Conversational and guided next-best-action experiences for budgeting and financial habits.
- **RAG / content intelligence:** Connecting financial education material to personalized in-product guidance.
- **KribSavup analytics:** User activity, tool adoption, and education-to-action measurement for product decisions.

## **EDUCATION**

---

### **Dominguez High School**

Los Angeles area

## **ADDITIONAL**

---

- Strong domain expertise in consumer financial wellness and community-facing intelligent products.
- Comfortable owning AI/data problem framing while coordinating engineering, content, and delivery teammates.
- Available for AI Data Scientist engagements — hourly or fixed-price milestones.
